

Logitech®

Wireless Mouse M195

Comfortable control

- More comfort than a laptop touchpad
- Natural, intuitive control of your laptop
- Simple setup
- Plug-and-forget nano-receiver
- Months of use from one battery

Logitech® Wireless Mouse M195 gives you the comfortable, intuitive control you want for your laptop. Place your wireless mouse wherever it feels best and forget about performing tricky finger manoeuvres in a fixed location like you do with a touchpad. Instead you'll enjoy smooth, precise tracking, easy text selection and effortless scrolling. There's no complicated setup or software to install. The nano-receiver is so small you can plug it in once and forget it. The Logitech Advanced 2.4 GHz wireless connection is reliable and powerful. And intelligent battery management features ensure you'll have enough power to go for months between battery changes.
