hp high-gloss photo paper

universal hp printing material for large format printers

A resin-coated paper with an ink-receptive coating on one side. It is designed to give your graphics an enhanced and brilliant photographic look. It is recommended for applications requiring high ink loads with maximum density and colour saturation. It is ideal for displays, colour presentation, posters and photographic reproductions. This media is also compatible with *uv* inks.

| target customer	application	user needs
graphic artists & designers	• high quality indoor signs • posters	• excellent brightness, whiteness and gloss • good opacity
print service provider/retailer	• indoor signs with highly saturated colour images • photo images	• durable

features	benefits
economical photo paper	saves money and improves margins
printer flexibility	works on non-hp large format printers eliminating need to buy/stock other brands
thick, 178 microns base	allows wide range of mounting and laminating options

product specifications

weight	179 g/m^2
thickness/calliper	178 microns
smoothness	10 per TAPPI t-538 test method
whiteness	105 per CIE ganz 82 test method
brightness	90 per TAPPI t-452 test method
opacity	93 per TAPPI t-425 test method
gloss level	75 (60°)
country of origin	United States

environmental specification (based on hp designjet cp ink systems-dye)

operating temperature	15° - 30°C
operating humidity	30% - 70% RH
lightfastness	3 months indoors (w/delta e<10)
waterfastness	delta OD < 0.5
archivability	N/A
dry time	less than 8 minutes
shelf life	two year (minimum, when at operating spec.)

mounting & finishing (for specific information, see printing tips on the web)

lamination	yes (cold)
mounting	yes
