WS331c Feature

Extends Wi-Fi, perfect coverage

Extend existing Wi-Fi of wireless router or a wireless hotspot, increasing your wireless coverage. Especially for users, has thick walls in the family, or a great family .Solve Wi-Fi coverage issue

One-click setup, Plug and play

One-click setup by WPS button, just plug and play

Installation position indicator

Propose	Indicator is white
Not Propose	Indicator is orange

Installation position indicator, easy to find the best installation location, to achieve the best wireless performance

Intelligent Synchronization

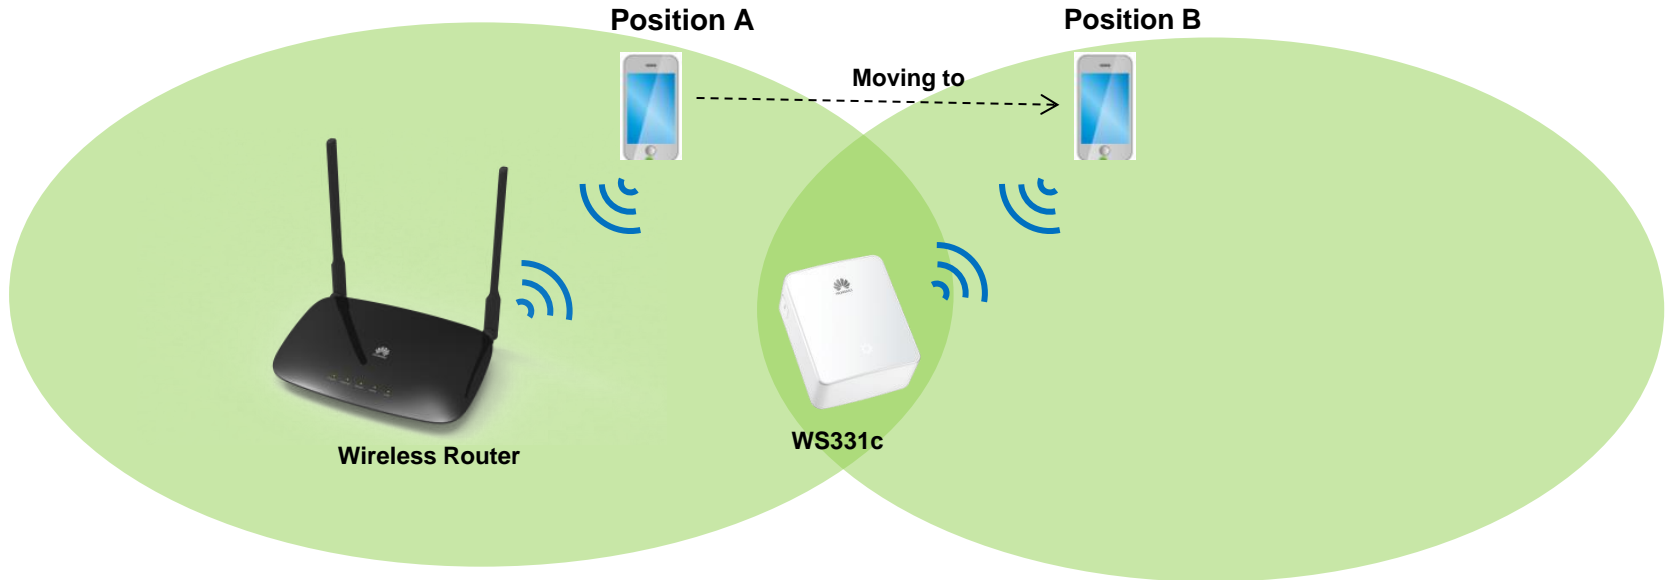

Are you worried about the parameters between wireless router and WS331c? How to manage them?

Working with the latest Huawei routers (after WS319), WS331c can achieve wireless synchronization

- 1 After connected to wireless router, WS331c can automatically learn the SSID and password
- 2 if you change the SSID and password on router, WS331c can automatically learn them too

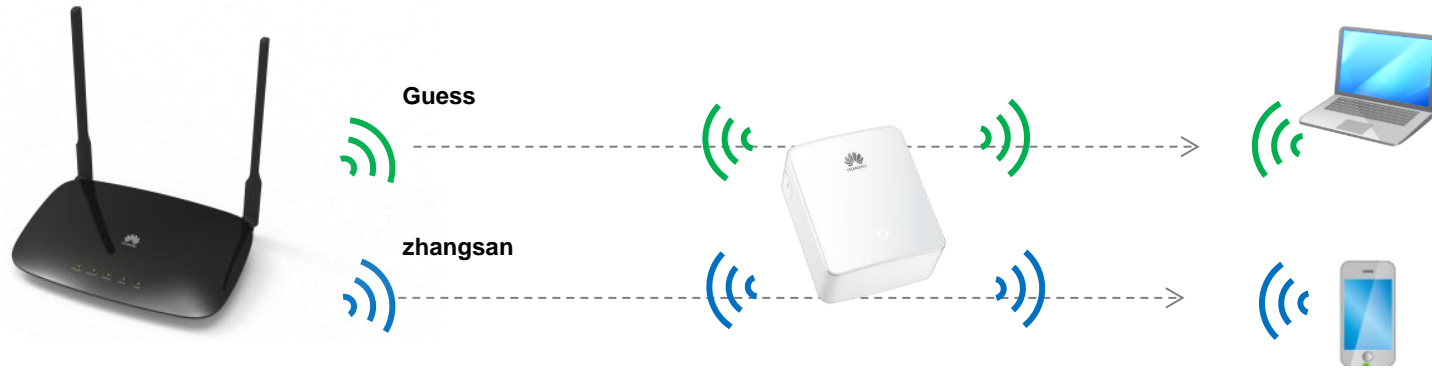

Intelligent Roaming

Which signal is good? The wireless router, or WS331c?

Working with the latest Huawei wireless router (after WS318), can Intelligently switch between router and WS331c, let device has better wireless connection

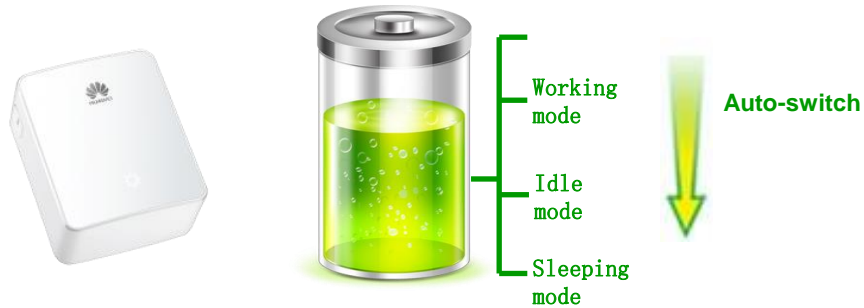

Dual Repeat

Since many users want to have two SSIDs, easy to distinguish family and guests, the router may be set two SSID names. WS331c support to repeat two SSIDs at same time

PS: Since WS331c is 2.4G device, if the router has 2.4G/5G two SSIDs , it can only repeat 2.4G

Energy saving

- 1 WS331c support working mode, idle mode, sleeping mode, auto-switch to achieve energy saving
- 2 In sleeping mode, LED can automatically reduce brightness, does not affect sleep

WS331c

300Mbps wireless range extender

- ◆ One-click setup by WPS
- ◆ Installation position indicator
- ◆ Wireless synchronization
- ◆ I-switch
- ◆ D-Repeat
- ◆ Energy saving

WLAN	802.11b/g/n, 2x2 MIMO, Wi-Fi repeater
Power supply	Build-in power supply
Button	WPS
Other feature	Wireless synchronization (work with latest huawei router) I-switch (work with latest huawei router) D-Repeat, can repeat 2 SSIDs Energy saving mode
