

HONOR Earbuds 2 Lite

Comfortable Design | Long Battery Life | Active Noise Cancellation | Seamless AI Experience

Fit and Comfy Design
Cool and Chic Colors

Ergonomic Design that Your Ears Love

Not feel a thing in your ear

When wearing HONOR Earbuds 2 Lite, you won't be able to feel a thing and anyone can enjoy an ultra-comfortable listening experience. Moreover, the in-ear design helps to seal the noise, providing you with an amazing passive noise-cancelling function.

For the most comfortable experience

Over the past year, HONOR collected thousands of eardrum data from different people, created myriads of sample models and adjusted the structure for HONOR Earbuds 2 Lite for hundreds of times, just to find the most comfortable shape for every one.

HONOR selected three different sizes of soft, flexible silicone tips that you can choose accordingly. There's definitely one that your ear loves.

Midnight Black

**Hear Every Note in Clarity
Speak Every Word Clearly**

Noise is Everywhere Around Us

Commuting
(Airport, metro, bus)

70-90 dB

Outdoor
(Street, market, park)

60-80 dB

Indoor
(Restaurant, café, mall)

50-70 dB

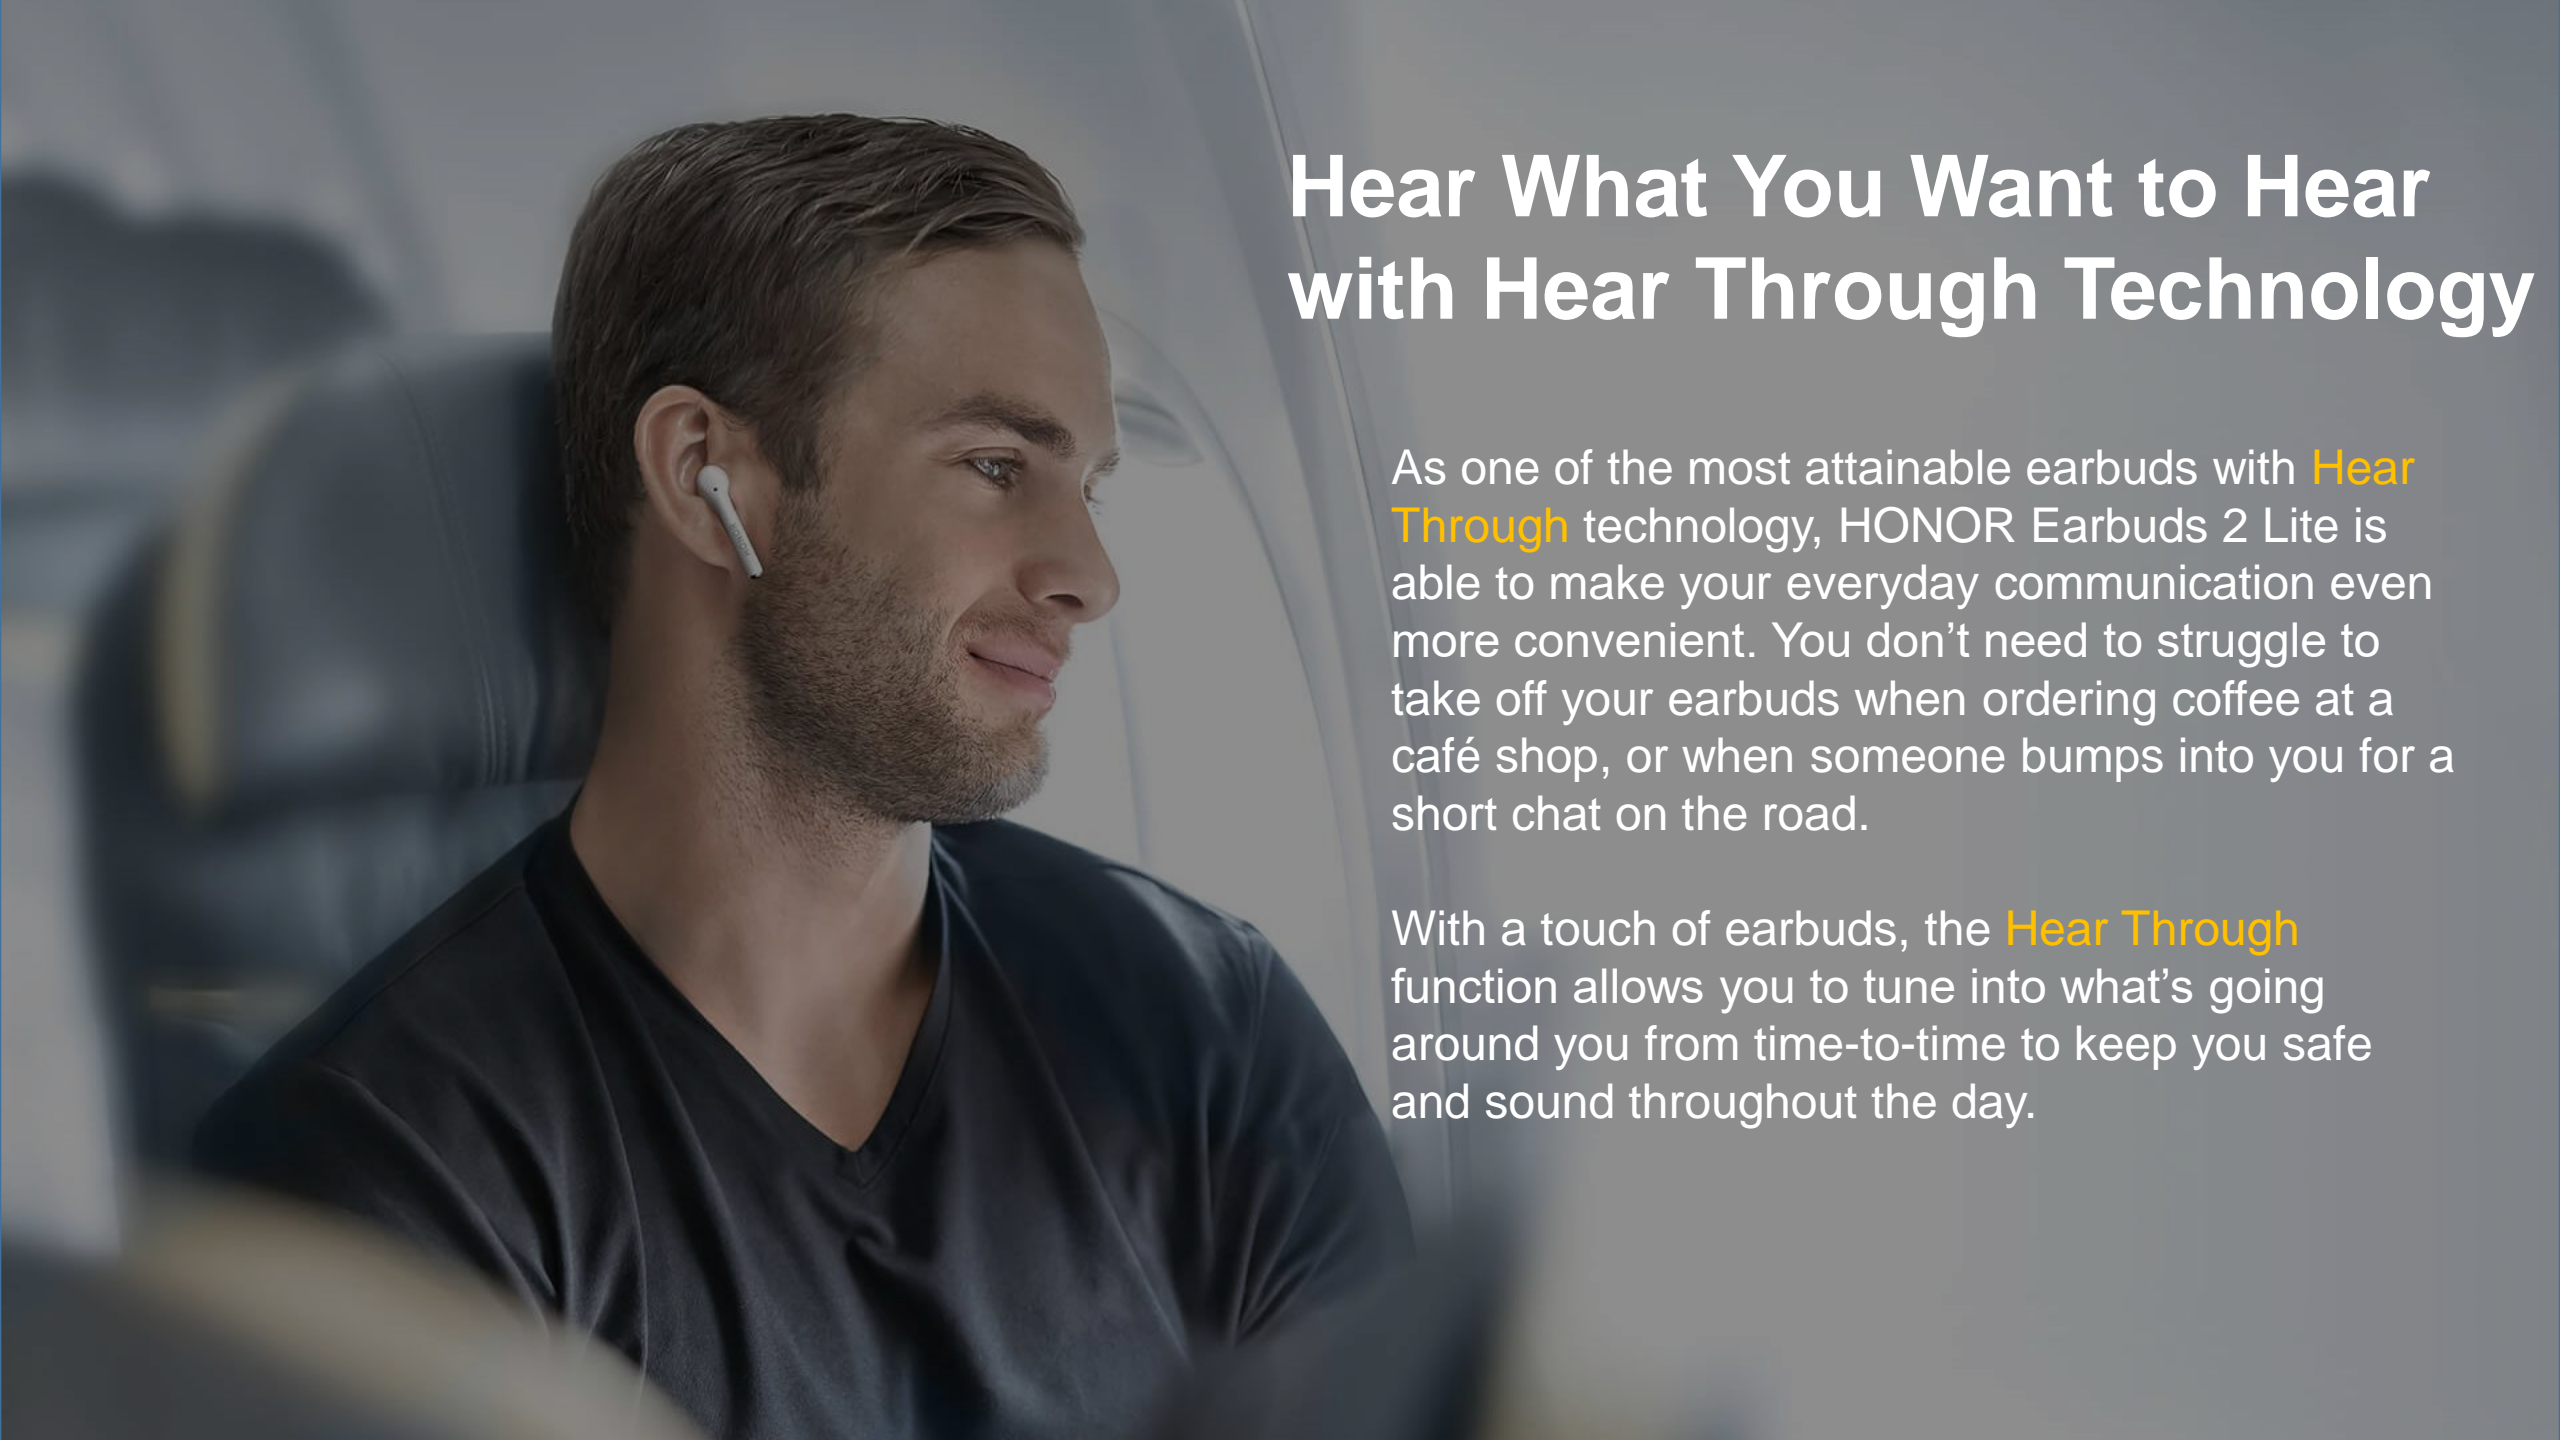

There are always different kind of noises around you, no matter if you're commuting to work, on the metro, jogging in the park, or hanging out by yourself in a café. With fully developed **ANC (Active Noise Cancelling)** and **HT (Hear Through)** technology, HONOR Earbuds 2 Lite helps you to filter out those disturbing noises and allows you to focus on the information you need.

Active Noise Cancellation

HONOR's Active Noise Cancelling(ANC) technology enables HONOR Earbuds 2 Lite to reduce up to **22dB***, equivalent to a running AC or an active computer. With HONOR Earbuds 2 Lite, you will not be distracted when enjoying your song list or having an online meeting.

HONOR had designed our earbuds to **keep everyone comfortable all day long**. Even with the ANC on for a long time, you will not feel tired or tedious.

A man with short brown hair and a light beard is shown in profile, looking out a window. He is wearing a white earbud in his left ear. The background is a blurred view of a window with a white frame.

Hear What You Want to Hear with Hear Through Technology

As one of the most attainable earbuds with **Hear Through** technology, HONOR Earbuds 2 Lite is able to make your everyday communication even more convenient. You don't need to struggle to take off your earbuds when ordering coffee at a café shop, or when someone bumps into you for a short chat on the road.

With a touch of earbuds, the **Hear Through** function allows you to tune into what's going around you from time-to-time to keep you safe and sound throughout the day.

Dual Anti-Wind Tunnels to Reduce Wind Noise

Secondary Mic

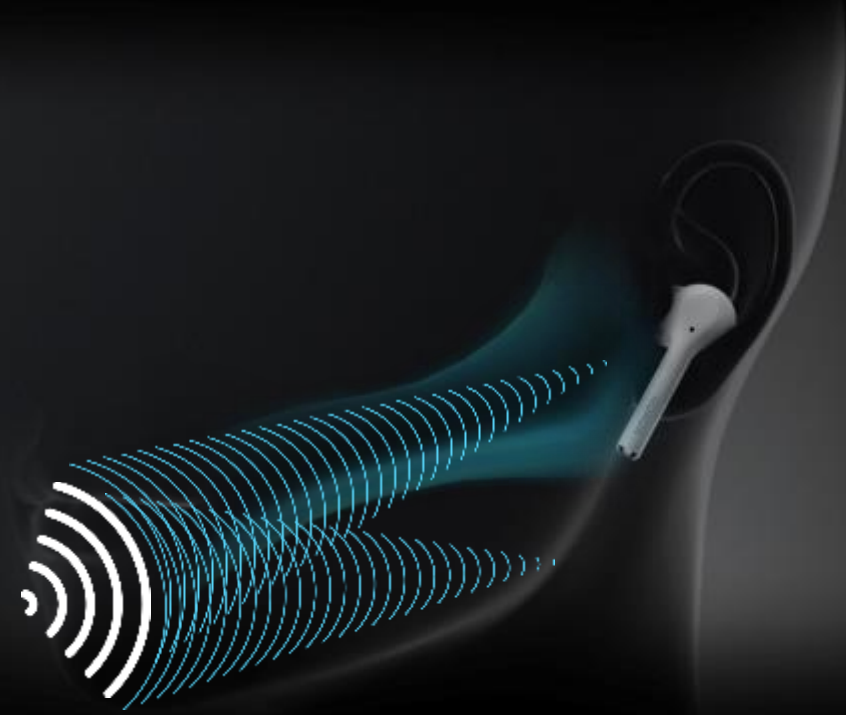

Main Mic

HONOR Earbuds 2 Lite has two mics – a main mic and a secondary mic - to capture every word you say. Using **industry-leading dual anti-wind tunnels**, HONOR Earbuds 2 Lite can dramatically reduce the noise created by wind from open air and make sure others can clearly hear every word you say.

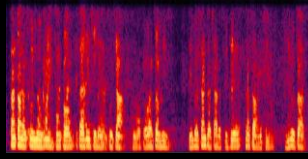

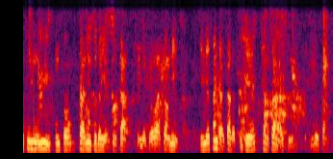

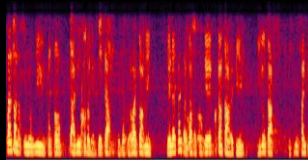

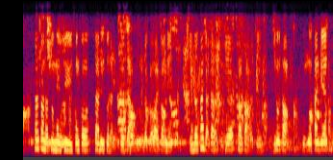

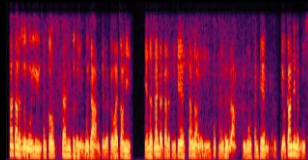

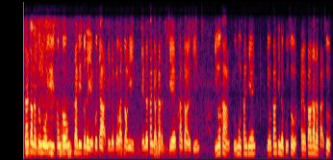

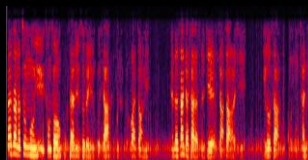

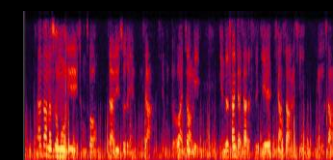

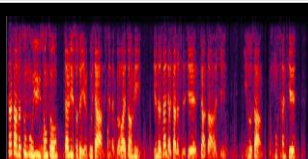

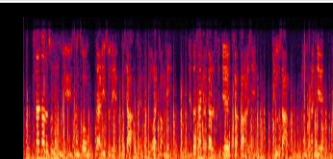

Clearer Voice Calling Experience

HONOR combines the traditional wave noise reduction technology and **Deep Neural Network(DNN)** to optimize HONOR Earbuds 2 Lite's voice-calling experience. The traditional method uses two mics to acquire bi-directional sound signals and then by using **DNN**, HONOR's AI algorithm extracts the caller's sound from the noisy background to enhance its clarity.

Brand New Sound Quality

10mm high-quality sound driver

With the newly customized **10mm** high-quality sound driver, HONOR Earbuds 2 Lite produces crisp, clear audio and rich, deep bass that allows you to hear every detail.

Individual rear cavity

HONOR Earbuds 2 Lite brings you one of the most original singing voices without redundant electrical processing. In order to achieve this, HONOR re-invented the individual rear cavity, the isolated speaker and other structures to keep the sound consistent, providing one of the most natural and immersive experience.

**PEEK+PU
Diaphragm**

*HONOR carefully selected only the most premium materials for HONOR Earbuds 2 Lite's driver – **PEEK and PU**. Peek is an ultra-light material that are commonly used by aircrafts and has excellent physical property that guarantees an incredible high-frequency sound quality. PU's high compliance design ensures a clear, accurate and strong bass.*

Long Lasting Battery Life
Enjoy Your Music Anytime, Anywhere

32-Hour Long-Lasting Battery*

10 hours*

of listening time on a single charge

32 hours*

of listening time with case
