

Nokia 5310 (2024)

A fresh face for an audio icon

Big on music

A blast from the past. Nokia 5310 rocks the nostalgic Xpress music design, complete with dedicated music buttons, dual front-facing speakers, and Bluetooth® connectivity. Tune in to your own tracks with the MP3 player¹ or local stations. Why not play a game of Snake between playlists? It's all powered by a battery that goes for weeks on standby.

An old favorite returns

Nokia 5310 is back with a bigger and better 2.8" IPS display and more battery life than its predecessor. But some things haven't changed, like its easy-to-use buttons, smooth curves, and a comfortable grip. Clarion is a new take on an old favorite – an iconic design with a fresh face.

Music to your ears

Flick through your favorite radio stations or skip through your MP3s using the dedicated music control buttons. Sound good? It will, thanks to the dual front-facing speakers.

Let the music play...

Nothing kills the vibe like your music cutting out. That's why Nokia 5310 features a large 1450 mAh³ battery to keep it going. So go ahead and hit that Play button.

If it's important, they'll call or text.

We had fewer apps in the noughties. Fewer channels to be present on. But were we any less in touch? Strip away today's notifications from likes, shares, and comments, and what you're left with are conversations with people you care about the most.
